Pedestrians are granted access to the workplace through the gates in the guard house. Drivers of cycle or two-wheeled motor vehicles are granted access to their workplace through the guard house's main gate. A temporarily access permissions is required for other vehicles.

Temporarily access permission

Is requested by an authorized visitor to the recipient or the contact person for each internal company and is notified to the security guard which creates a temporary car pass in accordance with the applicable rules. For entry at evenings a special permission is required. When leaving the area the car pass shall be returned, unless otherwise agreed.

Permanent access permission are given to employees who have their place of work or responsibility below the channel path. The application is sent to Domsjö Fabriker Head of Security. Known company vehicles are deemed to have a permanent access permission.

For Harbor access a special permission from the port manager is required.

Entry Routine

Obtained car pass shall be placed visible to the security guard on the right side window of your vehicle. Entry of vehicles may be proceeded after the vehicle has stopped in front of the guard house, has received the yellow blinking traffic light and received clearance from the security guard. Granted access permission only applies to and from the workplace.

Anyone who has received and accepted the access to the industrial area has also consented to lease vehicles and belongings for inspection.

Domsjö industrial area

Traffic Information

The companies within the Domsjö industrial area places high demands on the working environment, external environment, safety and quality. The labor market's laws and regulations have therefore been complemented with our own general and local safety regulations. A work permit is required for all work in the industrial area and assigned the recipient of the safety information that each company provides. All who accept admission to the industrial area is required to know and apply these rules.

The guard house is manned by security guards during weekdays at 6 AM to 6 PM, and is remotely monitored during all other times. The communication is made through intercoms that are located inside the guard house.

Monitoring of the industrial area and the gates is done at all hours with cameras and also by patrolling guards during the evening.

Traffic in the industrial area should be extended into account since there is loading and towing vehicles with limited visibility. Maximum speed is 30 km per hour. The industrial area is a fenced area according to Road Safety Regulations and therefore Road Traffic Acts are valid.

Parking is only permitted in designated parking spaces. When loading and unloading the start keys must be left inside the vehicle.

The exit of goods shall take place during daytime at 7 AM to 4 PM. Delivery Notes shall always be left to the guard house.
