

## CONTRACTOR ASSURANCE

Ansvarig utgivare	Godkänt av	Datum	Senast reviderad
Sven Westman		2015-04-07	2019-03-29

## Access

To get access to Domsjö Fabriker it is required that the contractor's employees have:

- **General safety information "SSG Entre"\***
- **Local safety information "SSG Entre - local part"\***
- **Created in SSG Access high for the current assignment**
- **Specific Workplace safety information (given at site upon arrival)**

Domsjö Fabriker requires that each contractor respectively and their employees have the training and experience required for each duty.

A risk analysis of the work should be done before the work starts. The risk analysis is carried out in agreement with the contact person at Domsjö Fabriker (can be established by contractor, by Domsjö Fabriker or in collaboration depending on the nature of work). No work can be started before the risk analyze is made, the identified risks has been taken care of and the risk analyze has been sent to your contact person at Domsjö Fabriker. As contractor you are responsible to communicate the identified risks to your employees for the work intended.

Upon arrival everyone must report to the security guard in the guard house.

\* Entre-passport and Entre local part are two interactive web training programs that are registered at the SSG Access card you get after you completed the training program. SSG local part is a requirement at Domsjö Fabriker, after September 1, 2016 you cannot schedule an appointment for safety instruction via contact person at Domsjö Fabriker.

---
